

## **Building research and innovation partnerships at the Industrial Technologies 2010 Conference**

*A Matchmaking day and NMP Infoday for R&D projects and technology cooperations is organized on 9 September in Brussels*

The **Matchmaking event** is the unique meeting place for European companies and research organisations in the nano, materials and production (NMP) sector. The aim is to give participants the opportunity to meet potential partners for their innovative technology, research projects and cooperating opportunities.

More than 600 pre-arranged and on-site face to face meetings will foster transnational technology and research co-operations.

This event is organized during the [Industrial Technologies 2010](#) Conference by the Flemish Enterprise Europe Network partner, IWT and the NMP National Contact Points.

Next to the matchmaking event, **information sessions** are organised about the new calls for European collaboration projects within the FP7 NMP programme. Project officers of the European Commission will highlight the opportunities for R&D projects. It will be also possible to meet project officers and to discuss project ideas and other aspects regarding participation in FP7.
